

Complete Summary

TITLE

Identification of high-alert medications: does the hospital have a list of high-alert medications?

SOURCE(S)

Structure

The validity of measures depends on how they are built. By examining the key building blocks of a measure, you can assess its validity for your purpose. For more information, visit the [Measure Validity](#) page.

SECONDARY MEASURE DOMAIN

Does not apply to this measure

Brief Abstract

DESCRIPTION

This measure is used to determine whether or not the hospital has a list of high-alert medications.

RATIONALE

Certain types of medications have been repeatedly shown to cause adverse drug events and should be viewed as particularly serious threats to patient safety.

The existence in the hospital of a list of high-alert medications reflects its endeavors to prevent adverse events associated to these medications, highlighting the need of having particular precautions with them.

PRIMARY CLINICAL COMPONENT

High-alert medications list

DENOMINATOR DESCRIPTION

This measure applies to hospitals (one hospital at a time).

NUMERATOR DESCRIPTION

The hospital has a list of high-alert medications.

Evidence Supporting the Measure

EVIDENCE SUPPORTING THE CRITERION OF QUALITY

- A formal consensus procedure involving experts in relevant clinical, methodological, and organizational sciences
- One or more research studies published in a National Library of Medicine (NLM) indexed, peer-reviewed journal

Evidence Supporting Need for the Measure

NEED FOR THE MEASURE

Overall insufficient capacity
Variation in capacity

EVIDENCE SUPPORTING NEED FOR THE MEASURE

Evaluation of Measure Properties

EXTENT OF MEASURE TESTING

After pilot testing, the set of indicators has been measured in a random sample of 25 Spanish hospitals, stratified by hospital size. The main objective has been to field test the feasibility of measurement in the various settings representing real life situations in the context of the Spanish Health Care System.

Both the whole indicators validation report and the results of the baseline measurement in a sample of the Spanish National Health Service (NHS) hospitals may be accessed and downloaded from the Spanish Ministry of Health web page (in Spanish):

- [Validation report](#)
- [Results of baseline measurement in Spanish NHS hospitals](#)
